20a. How does the Committee accomplish its purpose?

Section 492 of the PHS Act states that The Secretary...shall by regulation require appropriate technical and scientific peer review of -- (A) applications...; and (B) biomedical and behavioral research and development contracts.... This committee is composed of recognized biomedical and/or behavioral research authorities who represent the forefront of research and technical knowledge and who provide first level merit review of highly scientific and technical research grant applications and contract proposals in the fields of neuroimmunology, neurovirology, academic medicine, basic research and clinical sciences related to the mission of the National Institute of Neurological Disorders and Stroke (NINDS). Operation of this committee is accomplished using a fluid membership, with members designated to serve for individual meetings rather than formally appointed for fixed terms of service. During this reporting period the committee reviewed 1021 applications requesting \$1,895,200,889 in total direct costs for all years. In addition, panels reviewed 102 contract proposals for the loan repayment program.

20b. How does the Committee balance its membership?

This committee has a fluid membership, with members designated to serve for individual meetings rather than formally appointed for fixed terms of service. The reviewers for each meeting are selected to evaluate grant applications and/or contract proposals for a specific, perhaps narrow, expertise area. Participants for each meeting are assembled to most efficiently cover the number and breadth of applications or contracts requiring review.

20c. How frequent and relevant are the Committee Meetings?

The National Institute of Neurological Disorders and Stroke Special Emphasis Panel held 55 meetings during this reporting period.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

This committee is composed of recognized biomedical and/or behavioral research authorities who represent the forefront of research and technical knowledge and who provide first-level merit review of highly scientific and technical research grant applications and contract proposals. These evaluations and recommendations cannot be obtained from other sources because the specialized, complex nature of the applications and proposals requires a unique balance and breadth of expertise not available on the NIH staff or from other established sources.

20e. Why is it necessary to close and/or partially closed committee meetings?

The meetings of the National Institute of Neurological Disorders and Stroke Special Emphasis Panel were closed to the public for the review of grant applications and contract proposals. Sections 552b(c)(4) and 552b(c)(6) of the Government in the Sunshine Act permit the closing of meetings where discussion could reveal confidential trade secrets or commercial property such as patentable material and personal information, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

21. Remarks

This committee did not produce any public reports during the fiscal year. This committee does not have a public website. Due to the large number of members associated with this committee, NIH staff are unable to provide zip codes for all members. Current individual meeting rosters, including zip codes, are available on line at:

<http://public.era.nih.gov/pubroster>. Past individual meeting rosters are available by contacting the DFO. The DFO and Committee Decision Maker positions are both held by W. Ernest Lyons, Ph.D. He is the Chief, Scientific Review Branch, Division of Extramural Activities, NINDS. As Branch Chief, he is responsible for overseeing the Scientific Review Officers who administer the Special Emphasis Panels.

Narrative Description

Section 492 of the PHS Act states that “The Secretary . . . shall by regulation require appropriate technical and scientific peer review of – (A) applications . . . and (B) biomedical and behavioral research and development contracts . . .” This committee is composed of recognized biomedical and/or behavioral research authorities who represent the forefront of research and technical knowledge and who provide first-level merit review of highly scientific and technical research grant applications. Operation of this committee is accomplished by using a fluid membership, with members designated to serve for individual meetings rather than being formally appointed for fixed terms of service. During this reporting period the committee reviewed 1021 applications requesting \$1,895,200,889 in total direct costs for all years. In addition, panels reviewed 102 contract proposals for the loan repayment program.

Cost Savings Comments

NIH-supported basic and clinical research accomplishments often take many years to be translated into new diagnostic tests and new ways to treat and prevent diseases.

What is the approximate Number of recommendations produced by this committee for the life of the committee?

8,718

Number of Recommendations Comments

This is the approximate number of applications reviewed by this committee from FY 2003 to 2018.

What is the approximate Percentage of these recommendations that have been or will be Fully implemented by the agency?

0%

% of Recommendations Fully Implemented Comments

NIH Peer Review Committees are involved in the initial review of research grant applications. The NIH dual peer review system is mandated by statute in accordance with section 492 of the Public Health Service Act. The charge to this committee is to determine scientific and technical merit of the individual grants or contracts. These recommendations are forwarded to Federal officials who generally accept the committee's recommendations and favorable applications are then forwarded for the second level of review performed by Institute and Center (IC) National Advisory Councils or Boards. Only applications that are favorably recommended by both the initial peer review committee and the Advisory Council may be recommended for funding.

What is the approximate Percentage of these recommendations that have been or will be Partially implemented by the agency?

Action Comments

An action of "approved" or "recommended" for grants receiving initial peer review by this committee does not infer that the grant will be or has been funded. Research grant applications submitted to NIH must go through a two-step review process that includes the initial peer review for scientific and technical merit and a second step of review and approval by a National Advisory Council for program relevance. In addition, prior to an award or funding being made, NIH staff must conduct an administrative review for a number of other considerations. These include alignment with NIH's funding principles, review of the project budget, assessment of the applicant's management systems,

determination of applicant eligibility, and compliance with public policy requirements. After all these steps have been completed, NIH officials make funding decisions on individual grant applications.

Is the Committee engaged in the review of applications for grants?

Yes
